

# BUILDING DECARBONIZATION GRANT PROGRAM

## OLD BUILDINGS, NEW FUTURE

We support your organization on its path to retrofit your building. Save money, increase efficiency, get off fossil fuels—and inspire your community to do the same!

**Applications open September 5, 2023**

**Deadline November 21, 2023**

**Get details, RSVP for September 19 Info Session, and apply: [www.bit.ly/decarbgrant](http://www.bit.ly/decarbgrant)**

**WHO:** Local governments, schools, libraries, faith-based organizations, & other nonprofits

**WHERE:** Greene, Rensselaer, Columbia, Ulster, Dutchess, and Putnam Counties  
We especially encourage applications from disadvantaged communities.

### Energy Studies \$5,000

Need to figure out your building's needs? Municipalities, college campuses, and public schools can use this grant as match for NYSERDA-funded energy studies.

### Engineering/Design/Grant Writing \$5,000-\$15,000

Get shovel-ready! Larger implementation projects often require engineering and design before they can get started. Use our funding for grant writing services too, if you need it.

### Implementation \$5,000-\$100,000

Apply for funding for heat pumps and geothermal, additional insulation, new windows and weatherization, solar installations, Energy Star appliances and induction stoves—anything that gets a building to greater energy efficiency and removes the need for fossil fuels.

**We make it feel more human! Additional support for grantees: Zoom office hours with experts, guest speakers, and field trips to inspiring projects. Join us!**
